Programme Monitoring Committee meeting held in Santiago de Compostela

Held on the 27 November under the Spanish Presidency, chaired by the Ministerio de Hacienda, this meeting was a moment to debate the current state of play of the programme and take decisions about the future steps to assure its good implementation during the following months.

CONSORTEX promotes the creation of 6 Export Consortia involving SMEs from 5 Atlantic countries

A set of meetings was launched to gather the companies interested in integrating the Interregional Exporting Consortia. A survey was conducted by the partners on the SMEs of the shipbuilding sector and its ancillary industry. The information collected allowed to identify 35 companies with a potential interest in being part of the Consortia. [Read more](#)

Azores hosted iFADO workshop on novel technologies to aid the Marine Strategy Framework Directive monitoring

Focused on international cooperation and the involvement of innovative technologies in ocean monitoring, the participants discussed the relevance of regional collaboration and new technologies for a cost-effective monitoring of large maritime areas, such as the European Atlantic Waters.
